

Setting Up Your AI Receptionist

Everything your practice needs to go live with Dentora. Complete the required steps to activate your AI receptionist — optional items improve accuracy and are strongly recommended.

STEPS 1 – 6 PRACTICE INFORMATION

01 Clinic Profile **REQUIRED**

The basic identity of your practice — used in patient-facing communications and throughout your dashboard.

Practice name Address Phone number Email address Timezone

02 Knowledge Base — Services, FAQs & Staff **REQUIRED**

Your AI receptionist draws on this to answer questions about treatments, pricing, team members, and policies. Add at least one service and one FAQ to proceed.

Service name Category Duration (mins) Price (£) Description FAQ question FAQ answer FAQ category Staff name & role
T&C document (PDF / DOCX / TXT · max 5 MB)

03 Voice & Tone **REQUIRED**

Choose your AI receptionist's voice, greeting script, speaking speed, and personality. A live preview plays before you save.

Voice selection Greeting message Tone Speaking speed Language

04 Phone Number **REQUIRED**

Select a UK phone number for your AI receptionist from the available list. This is the number patients will call.

Select number from list

05 Google Calendar Integration **OAUTH SETUP**

Authorise Dentora to read and write your Google Calendar so the AI can check real-time availability and book appointments. Completed via Google sign-in — no file upload required.

Google account email Calendar ID (optional)

06 Opening Hours & Schedule **REQUIRED**

Set your weekly operating hours, break windows, and any closed dates. At least one working day must be enabled to proceed.

Working days Open / close times Break windows Closed dates

Before you start — have these ready

- A full services list with treatment names, durations, and prices for both NHS and private treatments.
- Your most common patient questions — "Do you take NHS?", "What are your emergency slots?" etc.
- Your weekly opening hours including any half-days or regular lunch breaks.
- The Google account that owns your practice calendar — you'll authorise it in step 5.
- A CSV export from your current patient management system — you'll upload this in step 8.

STEPS 7 - 10 AI TRAINING, PATIENT IMPORT, TESTING & GO-LIVE

07 AI Context — Practice Documents OPTIONAL · RECOMMENDED

Upload documents about your practice so the AI gives richer, more accurate answers. Up to 10 files, 5 MB each. You can also paste information or a website URL directly into the AI chat window.

- Treatment brochures (PDF / DOCX)
- Price lists (XLSX / CSV)
- Policy documents (PDF / DOCX / TXT)
- Custom FAQ document (TXT)
- Clinic photo (JPG / PNG · max 1.5 MB)

08 Import Patient Records RECOMMENDED

Export your existing patient list from your current practice software and upload it as a CSV file. Dentora imports all records so the AI recognises returning callers by name from day one — no waiting for data to build up organically. Max 5,000 rows · 10 MB. See the column reference below.

- Full name (or First + Last columns)
- Phone number
- Date of birth
- Last visit date
- Notes / medical flags
- CSV file · max 10 MB · 5,000 rows

09 Test Call INTERACTIVE

Make a live test call to your AI receptionist before going live. Verify it answers correctly, books appointments, and handles edge cases. Nothing to prepare or upload.

10 Publish & Go Live REQUIRED

Review your full configuration and publish. Your AI receptionist activates immediately. Every setting can be changed at any time from your dashboard without any downtime.

STEP 8 PATIENT CSV COLUMN REFERENCE

COLUMN HEADER	REQUIRED	ALSO ACCEPTED AS	EXAMPLE VALUE
Full Name	YES	Name, Patient Name, Patient Or split: First Name + Last Name	Sarah Johnson
Phone Number	YES	Phone, Mobile, Mobile Number, Tel, Telephone, Contact Number	07712 345678
Date of Birth	NO	DOB, Birthdate, Birthday	1985-06-14 or 14/06/1985
Last Visit	NO	Last Visit At, Last Appointment, Last Visit Date	2025-11-03
Notes	NO	Note, Comments, Comment, Medical History	Allergic to latex

How to export from common systems — Dentally: Reports → Patient List → Export CSV · SOE / Exact: Patient Manager → Print → Export to Spreadsheet · Carestream R4: Patient → Search All → Export · Other systems: contact us and we will help you extract the right columns.

COMPLETE ONBOARDING CHECKLIST

ITEM	FORMAT	NOTES
☐ Clinic name, address, phone, email, timezone STEP 1	Form fields	Required to proceed
☐ Services list (name, category, duration, price) STEP 2	Form fields	Minimum 1 service required
☐ FAQs (question + answer) STEP 2	Form fields	Minimum 1 FAQ required
☐ Staff names & roles STEP 2 · OPTIONAL	Form fields	Improves AI responses
☐ Terms & Conditions document STEP 2 · OPTIONAL	PDF / DOCX / TXT	Max 5 MB
☐ Voice, tone & greeting message STEP 3	Form / selector	Preview available before saving
☐ Phone number selection STEP 4	Select from list	Assigned UK Twilio number
☐ Google Calendar authorisation STEP 5	Google sign-in	Authorise in browser — no file
☐ Opening hours & schedule STEP 6	Form fields	Minimum 1 working day
☐ Practice documents (brochures, policies, FAQs) STEP 7 · OPTIONAL	PDF / DOCX / XLSX / CSV / TXT	Up to 10 files, 5 MB each
☐ Patient records CSV export STEP 8 · RECOMMENDED	CSV · max 10 MB · 5,000 rows	Full Name + Phone required
☐ Test call completed STEP 9	Interactive	Verify AI responds correctly
☐ Publish & go live STEP 10	Confirm in dashboard	Activates AI receptionist immediately
